EDUCATION

Nanyang Technological University	Aug 2024 - Dec 2028
Renaissance Engineering Programme Scholarship	CGPA: 4.84/5.0
- Bachelor's of Engineering Science (Computer Science) & Master's of Science in Technology Management - Minor in Mathematics - Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Software Engineering, Operating Systems, Databases, Algorithm Design, Probability, Statistics	
University of California, Berkeley	Aug 2026 - May 2027
Incoming Year-Long Exchange	

WORK EXPERIENCE

Data Engineering Intern	May 2026 – Aug 2026
Rakuten Viki	Singapore
- Refactored a schedule-driven ingestion workflow into an event-driven architecture using AWS Lambda, Airflow, Airbyte, PySpark, and S3, cutting execution time from 5 hours to 30 minutes - Redesigned a monolithic dbt transformation workflow of 100+ models into 10 domain-based Airflow DAGs - Configured Google Cloud Build CI/CD to automate staging and production deployments for AWS Lambda code	
Software Engineering Intern (Part Time)	Oct 2025 – Feb 2026
Tessely	Singapore
- Built a full-stack analytics platform (React, FastAPI) to transform uploaded raw operational data into actionable insights for non-technical users - Developed data-processing jobs to transform CSV uploads with 500+ process events into ReactFlow visualizations	
Software Engineering Intern	Dec 2025 – Jan 2026
OrULink	Shenzhen, China
- Developed 8+ pages for a mobile application, translating requirements into scalable React Native components - Integrated real-time ML models, Bluetooth communication and speech recognition into frontend workflows to enable intelligent user interactions with <2s response latency	
Software Engineering Intern	Mar 2024 – Jun 2024
I-Magination Solution	Singapore
- Built 10+ web pages using JavaScript, HTML & CSS for a workflow web application - Optimized RESTful API endpoints in C# and stored procedures in MySQL, reducing query execution times by 30%	

PROJECTS

ConverseBetter React, Next.js, TypeScript, Supabase, Vercel [Demo Link]	Dec 2025 – Feb 2026
- Developed a full-stack AI conversation training platform for BetterSG, enabling volunteers to practice empathetic communication with elderly seniors through configurable training scenarios and real-time coaching feedback - Engineered LLM pipeline for concurrent persona simulation, sentiment analysis, and coaching feedback generation - Conducted user testing at Pek Kio CC with 10 volunteer participants, achieving 90% satisfaction rate	
EduFinder React.js, TypeScript, Spring Boot, MySQL, OpenAI API [GitHub Link]	Sep 2025 – Nov 2025
- Built EduFinder, a GenAI-powered full-stack school search & comparison platform with real-time government data - Implemented caching to enable users to filter 300+ schools across 10+ criteria with <1s query latency - Developed NLP comparison engine using OpenAI API to generate personalized school recommendations	

TECHNICAL SKILLS

Languages: Python, Java, SQL, C#, JavaScript, TypeScript
Frameworks: React, React Native, Node.js, Django, .NET, Next.js, Spring Boot, FastAPI, dbt
Tools: Git, Postman, VS Code, Expo, Redis, Docker, Kubernetes, Airflow
Cloud: Supabase, Vercel, AWS Lambda, MWAA, Google Cloud Build
